

Adult and Child Post-Doctoral Fellowships in Evidence-Informed Practice Group

Peninsula Behavioral Health (PBH; www.penbh.com) is a unique private practice collaborative, where our mission is to create a clinician culture allowing for the best client care. We fundamentally believe that the best care depends on allowing clinicians autonomy and flexibility to practice the way they want. We are dedicated to providing high-quality, evidence-informed care. We are based in the bay area with satellite offices across california, and open to clinicians who want to work remotely.

PBH strongly values diversity and cultural humility. We are committed to equal opportunity in all policies and practices. Our mission includes a strong commitment to delivering care that is aware of the many roles that diversity plays in our services. We see a diverse range of clients, and are in-network with Aetna Stanford Health Care Alliance.

The Clinical Postdoctoral Psychology Fellowship at PBH is intended to help complete the training in psychology in a wide variety of evidence-informed practice. Fellows are offered a diversity of clinical experiences with expert supervision and consultation from highly experienced clinicians in the Bay Area, many of whom concurrently hold positions at Stanford University, the Palo Alto VA hospital, or Palo Alto University. Our clinicians have extensive experience with both behavioral and psychodynamic modalities, across psychopathologies. In all training clinics, fellows will have the opportunity to gain expert supervision in the following evidence-informed modalities: CBT, ACT, DBT, CPT, PE, IPT, and exposure.

Our mission is to provide the best clinical supervision to help our fellows transition into highly skilled, ethical psychologists who will contribute high-quality evidence-informed practice to our field. Positions are highly flexible with regard to work schedule and caseload size, ranging from two evenings per week to full time to meet individual needs. Interested candidates should be willing to make at least a 12-month commitment but are welcome to take more time to accumulate their hours.

Qualifications include:

- A Ph.D. or Psy.D. from an APA-accredited program in clinical or counseling psychology.
- Successful completion (or in-progress) of an APA-accredited internship.
- Fellows must complete all requirements for their degree and register as a psychological assistant in CA prior to beginning clinical training at PBH.

- Candidates with expertise in working with various forms of diversity and/or representing backgrounds typically underrepresented in the mental health field are encouraged to apply.

Fellows will be provided with:

- Clinical experience and supervision hours needed for licensure as a psychologist in the state of CA.
- Advanced training in evidence-informed practice and supervision towards independent clinical practice as licensed psychologists.
- A steady flow of diverse patient referrals.
- Stimulating weekly case consultation with supportive colleagues.
- Mentorship.
- Highly competitive compensation - \$70,000 annual stipend for full time work.
- Healthcare benefits.
- Flexible work schedule and caseload size.

Adult Track

PBH is seeking fellows with expertise in providing evidence-informed individual and group interventions to adults. PBH treats a broad range of psychological conditions, and positions are open to both generalists and specialists. Additionally, PBH houses specialty sub-clinics with distinct consultation teams, including trauma and PTSD, eating disorders, couples and families, and women's wellness. The opportunity to also practice in these specialty clinics may be of particular interest to candidates with these areas of expertise. Opportunities for didactic and clinical within clinics is available.

Child Track

PBH is also seeking fellows to provide evidence-informed individual, group, and family interventions to children/adolescents and their parents. Areas of clinical expertise may include mood and anxiety disorders, emotion dysregulation, ADHD and behavioral disorders, eating disorders, and/or learning and developmental disorders. Opportunities to provide psychological assessment may be available.

Virtual Care

We offer services via videoconference. Candidates who wish to provide virtual therapy from other locations while being part of an evidence-informed practice are welcome to apply (subject to the CA board of psychology's regulations on supervision requirements).

Applicants are invited to send a cover letter and CV to careers@penbh.com.
