

Adult Post-Doctoral Fellowship in Evidence-Informed Practice Group

Peninsula Behavioral Health (PBH; www.penbh.com) is a growing outpatient group private practice dedicated to providing high-quality, evidence-informed care to the San Francisco Bay Area. Our mission is to deliver psychotherapy in a highly client centered, professional, and collaborative environment. PBH strongly values diversity and cultural humility. We are committed to equal opportunity in all of its policies and practices, including the area of employment. Our mission includes a strong commitment to delivering care that is sensitive to the many roles that dimensions of diversity play in our services.

The Clinical Postdoctoral Psychology Fellowship at PBH is intended to help complete the training in psychology in a wide variety of evidence-informed practice. Fellows are offered a diversity of clinical experiences with expert supervision and consultation from highly experienced clinicians in the Bay Area. Our clinicians have extensive experience with both behavioral and psychodynamic modalities, across psychopathologies.

Our mission is to provide the best clinical supervision to help our fellows transition into highly skilled, ethical psychologists who will contribute high-quality evidence-informed practice to our field. Positions are highly flexible with regard to work schedule and caseload size, ranging from two evenings per week to full time to meet individual needs. Interested candidates should be willing to make at least a 12-month commitment but are welcome to take more time to accumulate their hours.

The PBH fellowship offers the clinical supervision hours needed for licensure as a psychologist in the state of CA, and provides advanced training and supervision towards independent clinical practice as licensed psychologists. Qualifications include a Ph.D. or Psy.D. from an APA-accredited program in clinical or counseling psychology and successful completion of an APA-accredited internship. Candidates with expertise in working with various forms of diversity and/or representing backgrounds typically underrepresented in the mental health field are encouraged to apply. Fellows must complete all requirements for their degree and register as a psychological assistant in CA prior to beginning clinical training at PBH. PBH fellows are provided with a steady flow of patient referrals, stimulating weekly case consultation with supportive colleagues, mentorship, and highly competitive compensation including healthcare benefits.

Adult Track

PBH is seeking fellows with expertise in providing evidence-informed individual and group interventions to adults. PBH treats a broad range of psychological conditions, and positions are open to both generalists and specialists. Additionally, PBH houses specialty sub-clinics with distinct consultation teams, including trauma (“StandTALL”; standtallclinic.com), eating disorders, couples and families, and

women's wellness. The opportunity to also practice in these specialty clinics may be of particular interest to candidates with these areas of expertise. Opportunities for didactic and clinical within clinics is available.

Virtual Care

During COVID we are offering all services via videoconference. Candidates who wish to provide virtual therapy from a location elsewhere in California while being part of an evidence-informed practice are welcome to apply.

Applicants are invited to send a cover letter and CV to careers@penbh.com.
