**Part- or Full-time Licensed Clinical Providers (Child/Adult)**  
**Position(s) in Evidence-Informed Practice Group**

Peninsula Behavioral Health (PBH; [www.penbh.com](http://www.penbh.com)) is a growing outpatient group private practice dedicated to providing high-quality, evidence-informed care to the San Francisco Bay Area and beyond. Our mission is to deliver psychotherapy in a highly client-centered, professional, and collaborative environment. In addition to general mental health practice, PBH houses several specialty sub-clinics, including eating disorders, trauma, women's wellness, and child/family.

PBH strongly values diversity and cultural humility. We are committed to equal opportunity in all of its policies and practices, including the area of employment. We strongly value delivering care that is sensitive to the many roles that dimensions of diversity play in our services. We are currently seeking licensed clinical psychologists or masters-level clinicians to join our team. Candidates with expertise in working with various forms of diversity and/or representing backgrounds typically underrepresented in the mental health field are encouraged to apply.

We are centered in Palo Alto and currently primarily provide services virtually. Providers practice from their preferred locations, which currently include San Francisco, San Diego, and Washington state. We intend to continue to expand geographically, and will likely re-establish offices in these locations when in-person practice resumes in earnest.

Candidates must be licensed or license-eligible clinical psychologists or masters-level clinicians in the state of California and demonstrate excellence in evidence-informed practice. Positions are highly flexible with regard to work schedule and caseload size, ranging from two evenings per week to full-time work. Providers have clinical autonomy to independently select cases, and intervene according to preferred orientation. Providers also have opportunities to supervise or teach in PBH's training program. Interested candidates should be willing to make a 12-month commitment.

PBH employees are provided with:

- Highly competitive compensation including healthcare and retirement benefits for eligible employees
- A steady flow of patient referrals
- Stimulating weekly case consultation with supportive and highly skilled colleagues with diverse expertise
- Monthly consultation groups specific to specialized clinics
- Continuing education stipend

- Opportunities for career growth by taking on supervision, administrative, leadership, or program development roles
- Clinical operation infrastructure to allow for safety in providing high levels of effective, efficient, and ethical clinical care
- Mentorship

PBH seeks to hire both adult and child therapists:

#### *Adult Therapists*

PBH is seeking clinicians with expertise in providing evidence-informed individual, couples and group interventions to adults. PBH treats a broad range of psychological conditions, and positions are open to both generalists and specialists. Additionally, PBH houses specialty sub-clinics with distinct consultation teams, including trauma, eating disorders, and women's wellness. The opportunity to also practice in these specialty clinics may be of particular interest to candidates with these areas of expertise. Individuals with expertise in couples/ family therapy and eating disorder treatment are especially encouraged to apply.

#### *Child Therapists*

PBH is seeking child therapists to provide evidence-informed individual, group, and/or family interventions to children, adolescents, and their caregivers. Areas of clinical expertise may include (but is not limited to) mood and anxiety disorders, ADHD and behavioral disorders, eating disorders, and/or learning and developmental disorders. Opportunities to develop a psychological assessment program and to assume other administrative responsibilities may be available to interested candidates.

#### *Virtual Care*

We will continue to offer services virtually when the pandemic recedes. Candidates who wish to provide virtual therapy from remote locations while being part of an evidence-informed practice are welcome to apply.

Applicants are invited to send a cover letter and CV to [careers@penbh.com](mailto:careers@penbh.com).
