

Postdoctoral Training Program Data

2022 - 2027

As proud APPIC members, we provide a supportive, mentorship-driven training environment that meets all California postdoctoral supervised practice requirements for licensure

01 Introduction

Since 2012, **Peninsula Behavioral Health** has been committed to delivering client-centered, compassionate, evidence-based psychotherapy.

Our **comprehensive fellowship program** offers doctoral graduates a **12-month competency-based training program**, designed to prepare fellows for licensure and independent practice.

Fellows gain invaluable experience across our General Clinic and specialized clinics – Women's Wellness, Child and Adolescent, Thrive (Eating Disorders), Trauma Recovery, and Relationships – while receiving expert supervision. Through structured didactics and individualized mentorship, fellows develop essential clinical skills and their unique clinical voice.

03 Graduate Programs Represented

Boston College

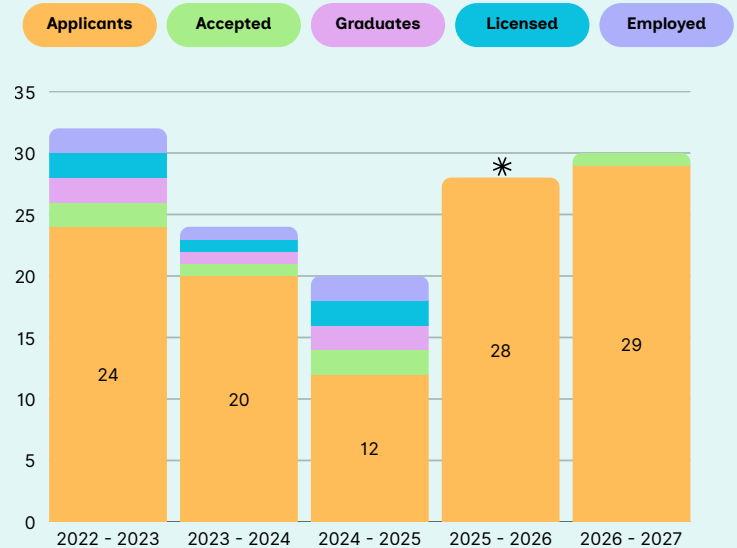

PAU Stanford PsyD Consortium

The Wright Institute

University of Nevada, Las Vegas

University of Washington

02 Applications & Graduates by Training Year

* **NOTE:** The 2025–2026 training year reflects a year in which the program did not match with an applicant. As a result, there were no trainees in the program during that training year, and no corresponding postdoctoral or employment outcome data are available for that cohort.

04 Internship Programs Represented

- * California Pacific Medical Center/Sutter Health
- * UC San Diego/VA San Diego Healthcare System
- * Kaiser Permanente Walnut Creek
- * University of Washington Counseling Center
- * SJSU Counseling Center
- * VA Northern California Healthcare System, Martinez
